

Clinical Supervision Workshop for Supervisors

Learning Outcomes

• Broaden your understanding of clinical supervision and its benefits to professional practice

• Develop an awareness of the ethical, legal, and boundary issues in clinical supervision

• Learn and demonstrate the general skills and competencies for professional clinical supervision

• Review different models of clinical supervision

• Identify best practice, guidelines and support available for supervisors

• Consider the most appropriate method to implement and sustain clinical supervision in the workplace

- Are you providing and/or receiving Clinical Supervision?
- Do you wish to develop knowledge and skills to provide clinical supervision to colleagues?

NHS Fife in collaboration with the University of Dundee is now providing a 2 day clinical supervision workshop for supervisors aimed at nurses working in mental health and public health services. The workshop is open to staff who will be providing clinical supervision to colleagues in the workplace.

About the workshop

The 2 day workshop is interactive throughout and will consist of presentations, discussions, role play workshops and feedback. The course will equip staff with the knowledge & skills required to effectively facilitate clinical supervision in a safe and supportive environment. The workshop will be facilitated by staff from NHS Fife and University of Dundee. Each workshop will have a maximum of 21 participants.

Following attendance at these workshops staff will be expected to provide clinical supervision in the workplace.

Dates:

Workshop 1: 27th & 28th November 2012

Workshop 2: 15th & 16th January 2013

Workshop 3: 28th & 29th January 2013

Venue: School of Nursing & Midwifery, Fife Campus, Kirkcaldy.
